METABIOTA®

Case Study

Early Warning of COVID-19 Enabled 100%+ Revenue Growth in 2020 for Events Software Company

The Challenge: Epidemic Risk

Bizzabo is the market leading event success SaaS platform serving enterprise clients including Bloomberg, Salesforce, Hubspot's INBOUND, and more. After nearly doubling revenue in 2019, the plan for 2020 was to grow even faster. Then, COVID-19 happened.

The Solution: Early Warning

In late December 2019, Metabiota's epidemic detection system first identified an emerging coronavirus with the potential to cause human and economic loss—flagging COVID-19 five days before the WHO. By late January, Metabiota had already been tracking the risk of the virus' global spread for weeks. The analytics within Metabiota's Transit Hub Risk module of their Global Epidemic Monitoring and Modeling platform showed high potential for rapid further spread of the virus. The early data that Metabiota gathered and modeled also pointed to significant under-reporting of cases. This information was included in a January Metabiota Risk Report, when few thought there could be a significant impact to the global economy.

Key Benefit

- 6 weeks' advance warning of impending pandemic threat

Key Results

- Successful early pivot to online events
- 100%+ revenue growth in one year
- Outperformed

9. <https://t.co/D4Oh2TH5LS>

That is the key question

1. DARPA/DTRA use NGOs like Ecohealth or Metabiota to collect new pathogens

2. They are sent to US labs (Mailman, Rocky Mountain, Atlanta CDC, UNC, USAMRIID) for GOF work by Lipkin, Nichols, Rasmussen, Baric, Dension, Munster, etc <https://t.co/wqhHK7uZO6>

— Billy Bostickson \U0001f3f4\U0001f441&\U0001f441 \U0001f193 (@BillyBostickson) January 5, 2021

2/X

We have already looked closely at Dennis Carroll, Peter Daszak, George Gao, W. Ian Lipkin & seen their public statements supporting "natural origin" & hysterical attacks on "lab leak" theories.

This thread focuses on:

Michael Kurilla

Jonna Mazet

Edward Rubin (Metabiota)
