The day you became a clearer thinker, you:

- started by identifying the real goal
- decomposed vague concepts
- framed the right questions
- sought more data or experience
- listened to multiple perspectives
- assessed upsides & downsides
- examined your own biases

-acted like an owner

This amazing graphic shows most of the cognitive biases and organizes them into themes.

But from the lens of evolution, if a cognitive bias increased fitness it is not a design flaw, but a design feature <https://t.co/lwvZfNsAlu> [pic.twitter.com/FLMhBjCLeg](https://t.co/FLMhBjCLeg)

Maps of knowledge are a valuable tool in navigating domains of information at a glance.

A good map:

- Titles & Categorizes
- Shows Scale & Relativity
- Orients Direction
- Uses Symbolic identifiers

Digital Gardening <https://t.co/snQzuZv9Ya>

A spectrum of digital gardening.

I like to think of it as the happy middle between chaos streams and full-scale cultivated performance.
