Learn CSS Layout

This site teaches the CSS fundamentals that are used in any website's layout.

I assume you already know what selectors, properties, and values are. And you probably know a thing or two

5■■ CSS cheat sheets

- Amazing CSS cheat sheet contains the most common style snippets

■■ <https://t.co/6zUS77xn4m>

The screenshot shows the CSS CheatSheet website. At the top, there are tabs for HTML, CSS, and JS. Below these are sub-tabs: Editor, Cheat Sheet (selected), Generators, Blog, and Links. The main content area is divided into two columns. The left column is titled 'Selectors' and lists various CSS selectors with their descriptions:

- ***: all elements
- div**: all div tags
- div, p**: all divs and paragraphs
- div p**: paragraphs inside divs
- div > p**: all p tags, one level deep in div
- div + p**: p tags immediately after div
- div ~ p**: p tags preceded by div
- .classname**: all elements with class
- #idname**: element with ID
- div.classname**: divs with certain classname
- div#idname**: div with certain ID
- #idname ***: all elements inside #idname

The right column is titled 'Basics' and contains sections for Syntax, Include external css file, Internal styles, Inline styles, and Clearfix. The Syntax section shows a CSS rule:

```
selector{
  property: value;
  property2: value2;
}
```

 The Include external css file section shows a link tag:

```
<link rel="stylesheet" type="text/css" href="/style.css" />
```

 The Internal styles section shows a style tag:

```
<style type="text/css">
div { color: #444;}
</style>
```

 The Inline styles section shows a tag with inline style:

```
<tag style="property: value"> </tag>
```

 The Clearfix section shows a clearfix rule:

```
.clearfix:after {
clear: both;
}
```

6■■ CSS Tricks

CSS tricks is a great CSS dedicated website where you'll find daily article, tips, tricks and much more
