ASAN GYAN OVER LONG TERM INVESTMENT

ASAN GYAN ON LONG TERM INVESTMENT

-To do successful long term investment needs to satisfy few criteria

-Must understand company business

-Must have estimate for future earning growth

-Must have convinction on his selection

-Must ignore short term price fluctuations

-Should not be active on social media much

-Long term investors need not ask daily

Can I hold ?
Can I hold ?

ASAN

This question simply tells that particular person have no confidence at all the stocks which he/she is holding.

-When You don't understand Business of a company, Don't invest for long term.

Long term investment needs better understanding about a company

If you call yourself long term investor and panic just 5/10% fall

It means your long term investment depends on price not on business

---

Generally People think that They will make good money if they do long term investment.

It's just a myth

Many people lost their capital also doing long term investment.

Long term investment good only if you know the future potential of a company and become right also .
