**Charity--Weekly worship:**

**As you all aware,I have been repeatedly telling that every place must have an association for weekly worship. The object of this is that once in a week people should all assemble & worship in the temple.People of other /1**

religions are doing this on their own without anyone having to tell them. It is because of their visible power of such prayer that they get many things including a new free state. But for us the great was we had commanded all over the world & it keeps decreasing day by day. /2

It is only in the thought that only if our people come together at least one day in a week forgetting their crookedness & dissolve their minds in Bhagwan something good will happen to this country. I have been asking people to organise weekly worship groups & this has been /3

followed in many places. These people should themselves take up the public service about which I talked. There is no need for separate organisation. The Thiruppavai, Thiruvempavai group in Mayavaram is carrying out several activities like this on a planned basis. The main 4/

objective of the group is to conduct conferences on these two paavais, distribute free to school children books on this paavais, conduct test for them in these and award prizes in them. /5
