Unicorn Riot @UR_Ninja and DDoSecrets just published nearly 500gb of data from the neo-Nazi group the Patriot Front. The data includes videos, photos, documents, and chat messages, leaked by an infiltrator with access to their private RocketChat server

You can get a torrent of the data from the DDoSecrets website. (Twitter still censors direct links to their domain)

https://t.co/u6XErvifGx

> Unicorn Riot @UR_Ninja waited until the Patriot Front fascists started their protest to dump all of their data. Here's a video where they're just learning about it https://t.co/8yzje7JbP5

When nazis write code they listen on port 1488 (a nazi codeword for "14 words" and "Heil Hitler")

So this what Detroit area "feds" do in the evenings? https://t.co/MWZvoiauXP

> I\u2019m at the police line between the pro life march and Patriot Front (feds probs) pic.twitter.com/JaIlNLqkQQ
