How to find high probability breakouts intraday trades .

Based on my experience , these are the best time to trade breakouts intraday ■

1■ When stock is doing small consolidation near major resistance & support  
Here risk is very low,

In such volatile market I mainly trading intraday with low risk breakout setup .

Making thread \U0001f9f5 on Intraday breakout strategy.

And how I play & when you should avoid intraday.

Try to explain full BO intraday strategy

With examples

Will share thread \U0001f9f5 after completed\U0001f4af

2■ When previous BO of stock are very strong with high volume.

#geecee

3■■ When stock is accumulating in very tight range with low volume & BO with very high volume.

Ex - #jagsonpal

4■ When major trend of stock & market must match each other.

And that time their sector must be strong ■

#tatamotors

5 ■ Recent example of intraday tight range setup for next week which is fulfilling all that criteria ■■

Ex - #NDTV

Here risk is 2/3% & reward is 8/15%
