1. Do Islamists prize Muslim lives?

Hindu Society Under Siege – 2

Do 'Muslim Lives Matter' in greater scheme of Islam? Sita Ram Goel had an answer. In a country like India: 'Islamism has evolved a strategy in which the Muslims of India are envisaged as a base and an arsenal'.

2. Individual Muslim lives are seen by their ideologues and leaders as cannon fodder for the conquest of India. Some salient features of this strategy can be outlined as follows: (all quotes are from Sita Ram Goel's book 'Hindu Society Under Siege')

#ArrestPratikSinha

3. "(a) The Muslims of India should be sealed off from every shade of rationalism, universalism, humanism and liberalism, and an army of mullahs and maulvis trained in the tenets of Islam should be let loose to brainwash and keep them along the right (Islamic) track;"
4. "(b) Every Muslim who doesn't accept Islamism or dares criticize it or stands for the mainstream of Indian nationalism, away from & above religious differences, should be denounced as a renegade and a legitimate victim for murderous Muslim mobs" (remember the Maharashtra boy?)
5. "(c) The Muslims should be encouraged to air as many grievances as can be invented, and try to pass off as a down-trodden minority, oppressed, exploited and treated as second class citizens by the brute Hindu majority;"
#ImpeachJusticeKant
6. "(d) These contrived grievances of Muslims should be used to convert the Muslim community into a compact vote-bank which can blackmail all non-Islamist political parties to accommodate Muslim candidates or include the maximum measure of concessions to the Muslim community;"
7. "(e) The Muslims should be progressively prepared to stage street riots on the slightest pretext, be it a stray pig, or music before a mosque, or Urdu, or the minority character of the AMU, or a purely personal fracas between toughs belonging to two communities;"
8. "(f) The frequent riots should be used to frighten the Muslims who should then be coaxed to create, consolidate and extend exclusive Muslim enclaves which can be stocked with arms and ammunition, imported or otherwise."
9. As we can see, Sita Ram Goel had foreseen the entire strategy which the Islamists still use today: which was used in the Nupur Sharma controversy leading up to the beheadings of innocent Hindus all over India. Meanwhile the Hindus are deluded with another strategy as follows:
10. "(a) The concept of Secularism which is enshrined in the Constitution of India should be distorted, misinterpreted and misused to the maximum to block out the least little expression of Hindu culture in the state apparatus and public life of India;"
11. "(b) The terms communal and communalism which have become terms of abuse in India's political parlance, should be carefully cultivated and more and more mystified to malign all those organisations, institutions and parties which do not serve Islamism;"
12. "(c) The accusation of being fascists and anti-secularists should be hurled at all who question the exclusive claims of Islam and its culture, who know and tell the truth about Islamic scripture and history, and who see through the Muslim game of grievances;"
13. "(d) All praise and support should be extended to those Hindus who go out of their way to champion Islamic causes, national and international, and who see in Islam and its culture those higher values which Islamism claims for them;"

14. "(e) All available platforms should be used to defeat and frustrate the emergence of a genuine and positive Indian nationalism by always harping on India's multi-racial, multi-religious, multi-language, multi-national, and multi-cultural character."

15. This free flow of Islamic fundamentalism and full suppression of all and any dharma in India has resulted in a situation in which the Muslims dominate every aspect of public life. Sita Ram Ji says that adding Arab money the extremely dangerous situation is as follows:

16. "(a) The rapid rise of a powerful press, mostly in Indian languages, and many publishing houses to propagate Islamism;" (Remember scroll, Wire, Quint, Caravan etc.)

17. "(b) The generous funding of old and the founding of many new maktabas, madrasas and institutes for teaching Islam and training missionaries who are then employed at high salaries for purifying the faith of die Muslim flock and seeking new pastures for converts to Islam;"

18. "(c) Buying of land and real estate all around in urban and rural areas by individual Muslims and Islamic institutions and organisations at whatever prices available;" (Waqf boards occupying India's land with mosques, imambaras and burial grounds.)

19. "(d) Manufacturing and storing of arms in mosques, Muslim homes and localities and training of Muslim toughs;"

20. "(e) Holding of frequent conferences, national and international, and taking out demonstrations in support of every Islamic cause;"

21. “(f) Financing Muslim politics and inducing Muslim politicians to infiltrate and ingratiate themselves in every political party, and function from every public platform;”

22. “(g) Bribing secularist Hindu intellectuals, scribes public workers and politicians, and buying them up for supporting Islamism, denigrating Hindu culture, and character-assassinating those who oppose Islamism;”

23. "(h) Using the lure of money for winning converts to Islam from the weaker sections of Hindu society, particularly the Harijans."

24. This is the current situation of Hindu society vis-à-vis Islam in India today. That is what SRG warned us about and the situation is many times worse today with the only thing is that through the efforts of SRG and other such scholars more Hindus are aware now.

25. Let us keep that flame of knowledge alive and it will destroy every sort of ignorance.

In the next thread, we will get to know what the strategy of Christianity is toward India.
