What is nirvana?

THE THIRD EYE EXPERIENCE

More knowledge expands our consciousness, the expansion of consciousness is the mercy of the soul. Further knowledge comes to us through special senses, such as the celestial eye and the subtle body.

Eye of knowledge (Third eye):

The Third Eye (Ajna chakra) will turn the understanding of meditation into reality. A tremendous experience that shows, you

have experienced meditation.

Eye of knowledge is a very powerful medium of our soul, a very powerful tool for seeing, feeling,

and hearing the reality of the afterlife. These three processes of the soul are the eye of knowledge.

More we meditate, the more power we get, the more power the dynamic eye moves. This is a unique experience of meditation

When the clairvoyant becomes dynamic, we feel the

we feel the tension on our brain, we see different colors all around us, And we feel as if we are traveling in a silent dark black tunnel. We have heard different sounds, the arrival of second-level clouds. We see the great man whose physical form is not with us. We see the

great man whose physical form is in our imagination. When consciousness increases we experience tingling in the physical body. It feels like our body is swimming, it looks like not only our limbs, our body feels as light as wings. This power is called transcendental power.

Giving more and more compassion gives us maximum Universal energy. The power to be active in all our work is increased by the power of the universe.

Each leaf will be a new level of understanding, after understanding the maximum amount we will understand the achievement of

other people more and more.

From this understanding we will understand that death never happens, we are infinite beings.
