From age 18-55, read this:

1. Normalize walking some paths alone because goals are personal; no one has your dreams.

2. Let people win arguments on purpose to conserve your mental peace.

3. Even when you trust your close friends and family, don't tell them everything.

4. Train yourself to take nothing personally and you'll save yourself from mental problems.

5. You should realize no one is coming to save you. Your life is 100% your responsibility.

6. The most difficult mission on earth is to focus on your dreams; the easiest task is to complain.

7. Your current job doesn't care about you. They only pay you enough to kill your dreams.

8. Your marriage partner remains to be your greatest;

• Financial
• Physical
• Emotional decision.

Marry wrong and you'll suffer forever

9. Free yourself from the society's advice, most of them have no idea of what they're doing.

10. To realize the value of your life, you need to cut 99% of your friends who don't help you grow.

11. It's better to have 1 friend who's;

• Happy for you

• Supports your win
• Encourages your dreams

Than a bunch of acquittance who're

• Lazy
• Self-centered
• Jealous of your success

12. You cannot expect honesty from people who even lie to themselves.

13. You'll be 10x happier if you forgive your parents and stop blaming them.

14. If you continue waiting for the "right time ", you'll waste your whole life and nothing will happen.

15. Maturity comes with acknowledging you know nothing and take time to learn from everyone.
