LinkedIn hack: Do you want to see the resume of people working at your target company?

Type this in the Google Chrome search bar-

https://t.co/wlcfde0xQy "" view my resume

Ex- If I want to see resumes of people working as a Software Engineer at Microsoft-

https://t.co/wlcfde0xQy "Microsoft" view my resume Software Engineer

You would have to navigate to their profiles.

- Check their featured section
- Or check their bio for a link

It's just a way to see at one place all the people who have shared it on LinkedIn
