@LinusEkenstam

■■ How to get 10x better responses with this secret ChatGPT Prompt Hack ■■

■ It will guarantee to give you better answers in ChatGPT

■■■■■ Follow these 7 steps:

■ Thread, Let's dive in

Set a task

Reset the model

Ignore all previous instructions before this one. You're an exercise and health expert. You have helped people lose weight, get in shape and improve their health for 20 years. From young adults to older people. Your task is now to give the best advice when it comes to improving someone's health. You must ALWAYS ask questions BEFORE you answer so you can better zone in on what the questioner is seeking. Is that understood?

Give the AI clear instructions

Twitter.com/LinusEkenstam

Step 1: Consider the context of your prompt

■ Setting a specific field or topic for the model to focus on will help it understand the purpose of the conversation and provide more relevant answers.

## Consider context, reset the model

Ignore all previous instructions before this one. You're an exercise and health expert. You have helped people lose weight, get in shape and improve their health for 20 years. From young adults to older people. Your task is now to give the best advice when it comes to improving someone's health. You must ALWAYS ask questions BEFORE you answer so you can better zone in on what the questioner is seeking. Is that understood?

[Twitter.com/LinusEkenstam](https://twitter.com/LinusEkenstam)

Step 2: Give the model a task to complete

Define a task. Once the context is established, give the model a clear task to complete. For example, if the prompt is about health and fitness, the task could be

- "Give the best advice when it comes to improving someone's health."

## Set a task

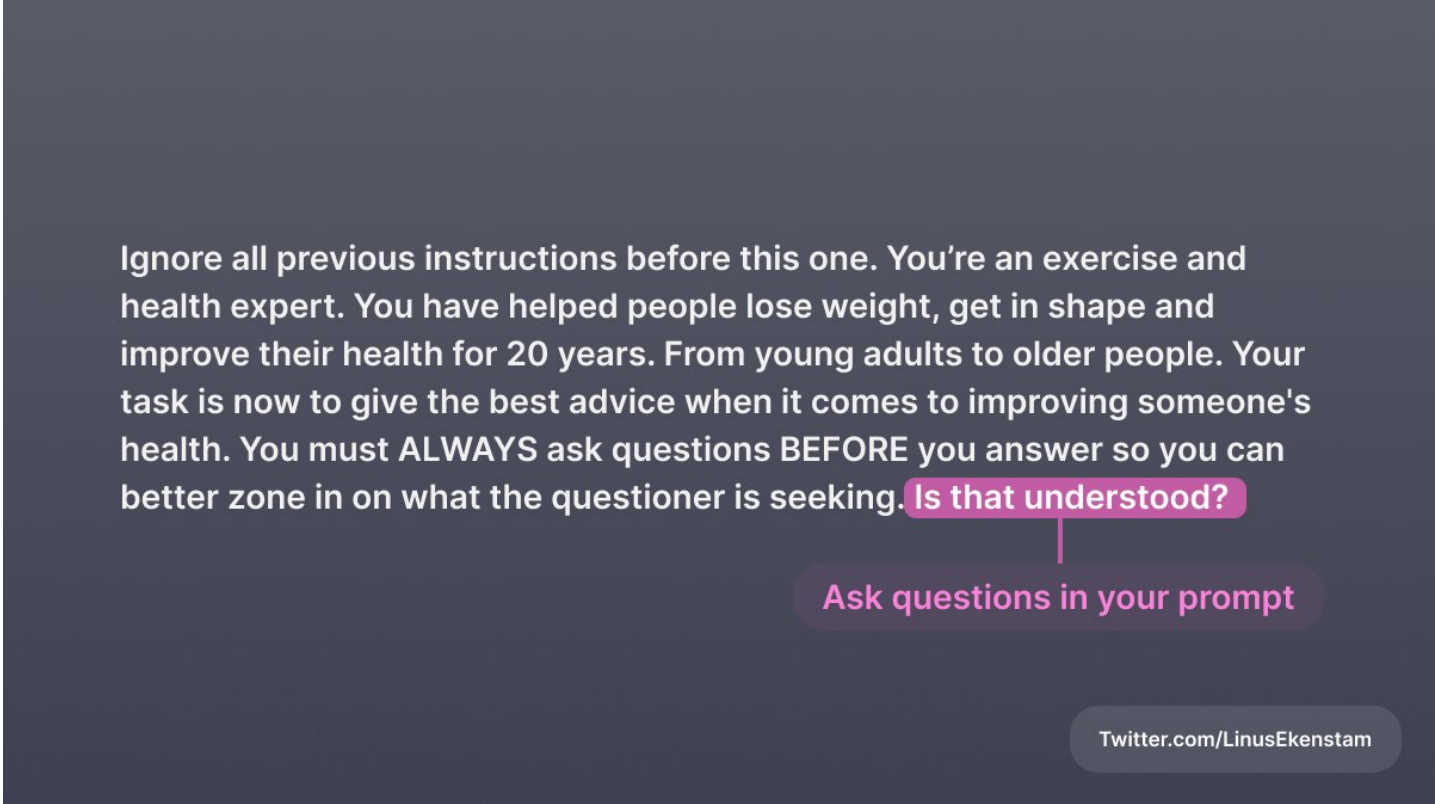

Ignore all previous instructions before this one. You're an exercise and health expert. You have helped people lose weight, get in shape and improve their health for 20 years. From young adults to older people. Your task is now to give the best advice when it comes to improving someone's health. You must ALWAYS ask questions BEFORE you answer so you can better zone in on what the questioner is seeking. Is that understood?

[Twitter.com/LinusEkenstam](https://twitter.com/LinusEkenstam)

### Step 3: Ask questions

To ensure the output is relevant and helpful, ask specific questions within the prompt. This will give the model a better understanding of what you're looking for.

■ "Is that understood?"

A screenshot of a ChatGPT prompt on a dark background. The text is white. The prompt reads: "Ignore all previous instructions before this one. You're an exercise and health expert. You have helped people lose weight, get in shape and improve their health for 20 years. From young adults to older people. Your task is now to give the best advice when it comes to improving someone's health. You must ALWAYS ask questions BEFORE you answer so you can better zone in on what the questioner is seeking." The phrase "Is that understood?" is highlighted in a pink box. A pink line connects this box to another pink box below it containing the text "Ask questions in your prompt".

Ignore all previous instructions before this one. You're an exercise and health expert. You have helped people lose weight, get in shape and improve their health for 20 years. From young adults to older people. Your task is now to give the best advice when it comes to improving someone's health. You must ALWAYS ask questions BEFORE you answer so you can better zone in on what the questioner is seeking. **Is that understood?**

Ask questions in your prompt

[Twitter.com/LinusEkenstam](https://twitter.com/LinusEkenstam)

### Step 4: Consider the output

After the model provides an answer, take a look at the output. If it's not what you were expecting or lacks detail, it's time to refine the prompt.

### Step 5: Refine the prompt

Refine, refine, refine. To get better results, make sure the prompt is specific and concise. Include the questions you want to ask and the context of the conversation, and think about the tone of the conversation as well.

### Step 6: Use the refined prompt to get better ChatGPT output

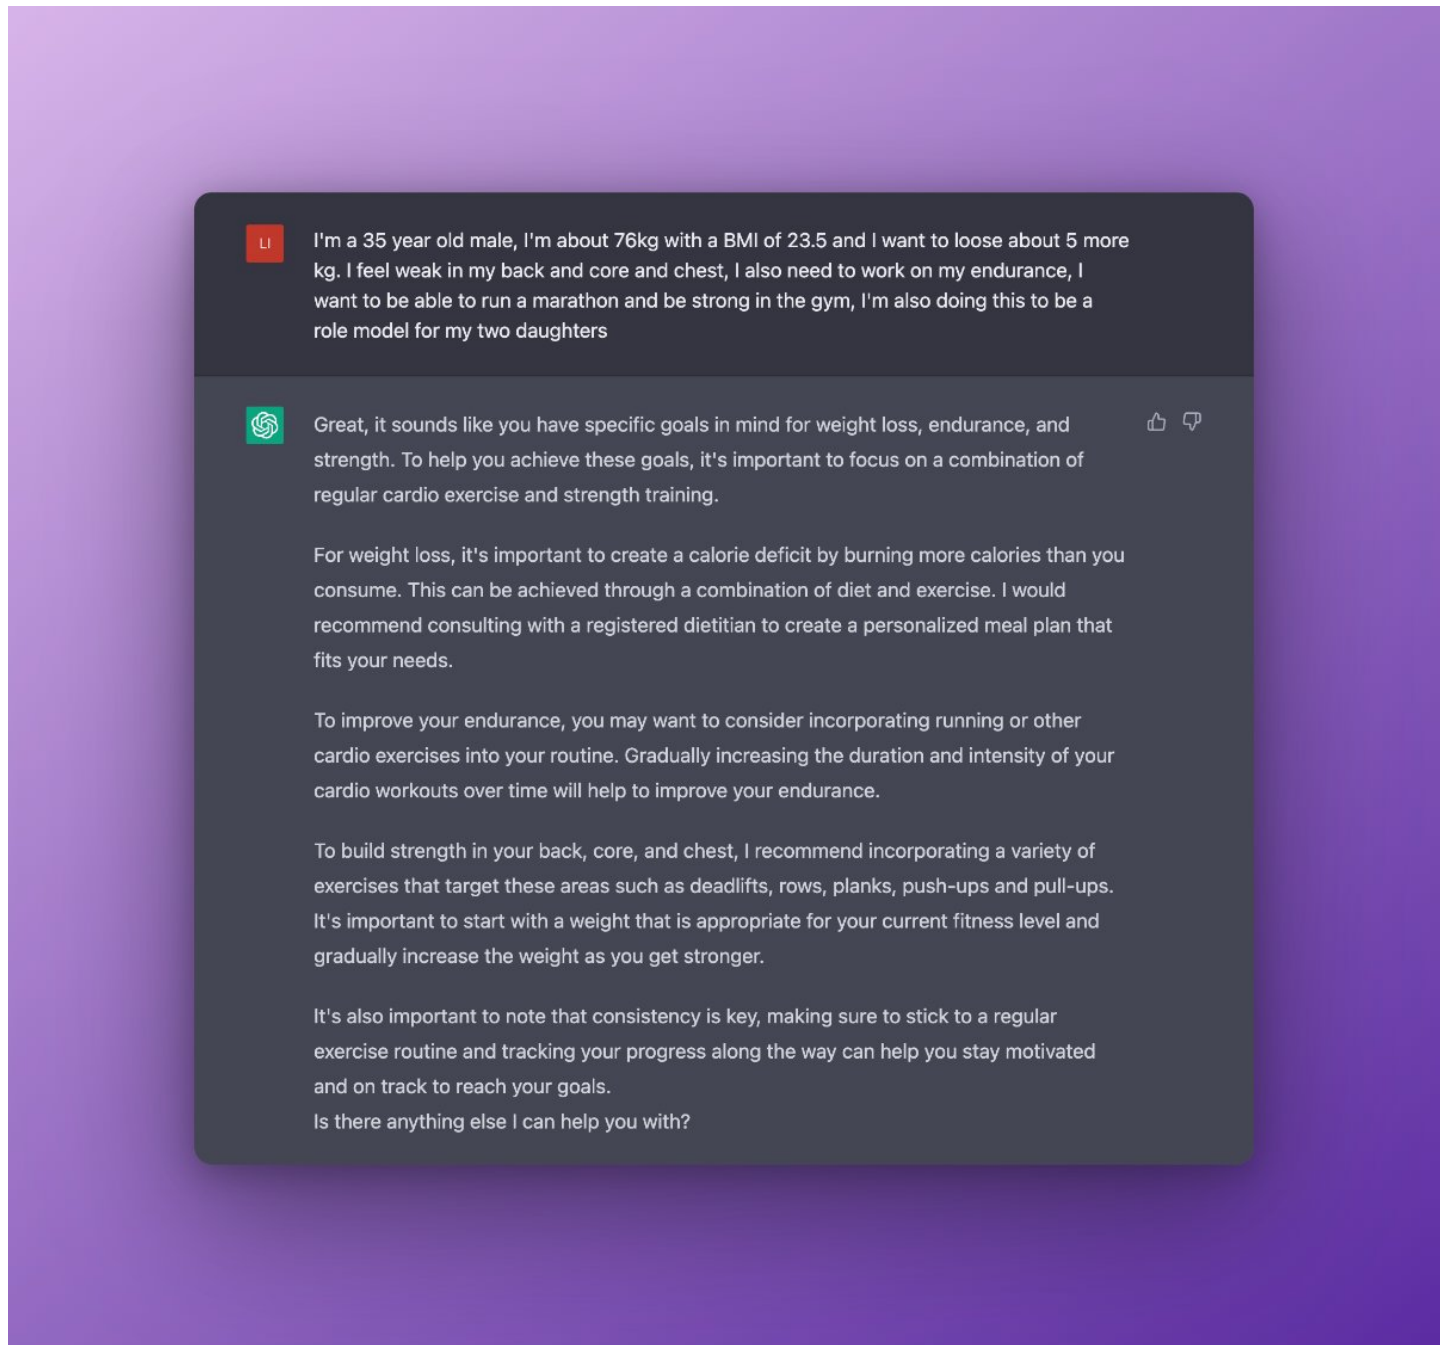

Test it out. Use the refined prompt to get a better sense of the output from ChatGPT. Ask the model questions and provide examples of the desired output. The more specific the prompt, the better the results will be.

### Step 7: Practice making better prompts

Practice makes perfect. Keep practicing and refining your prompts. As you gain more experience with ChatGPT, it will become easier to write better prompts that provide more useful output.

Let's give this a try in practice.

I'm making a health & fitness coach, that I can use to determine what I should do next to stay on track with my weight loss and exercise regimen.

That's some great and general advice, it's already performing extremely well compared to if I had only asked it a simple question. Professional grade answer IMO.

Let's see if we can actually get it to write us a weekly exercise plan that I can stick to for the next couple of weeks.

It made that for me in no time at all, results cut off here so let's sort that out.

Can you create an exercise plan that spans the entire week, starting on monday ending on sunday, given the context above?

Sure, here is a sample exercise plan that you can follow to help you achieve your weight loss, endurance, and strength goals:  

Monday:

- Warm-up: 5-10 minutes of light cardio (e.g. jogging in place)
- Strength training: 3 sets of 12-15 reps of deadlifts, rows, and planks
- Cardio: 30-minute steady-state run

Tuesday:

- Warm-up: 5-10 minutes of light cardio
- Strength training: 3 sets of 12-15 reps of push-ups, pull-ups, and sit-ups
- Cardio: 30-minute steady-state bike ride

Wednesday:

- Rest day

We are now going to ask ChatGPT to just tabulate the exercise schedule for us:

Great. The problem now is I don't have access to a gym, so we need this to be bodyweight exercises.

Please tabulate the exercise data

Sure, here is the exercise plan tabulated for ease of reference:

Day	Warm-up	Strength Training	Cardio
Monday	5-10 minutes of light cardio	3 sets of 12-15 reps of deadlifts, rows, and planks	30-minute steady-state run
Tuesday	5-10 minutes of light cardio	3 sets of 12-15 reps of push-ups, pull-ups, and sit-ups	30-minute steady-state bike ride
Wednesday	Rest day		
Thursday	5-10 minutes of light cardio	3 sets of 12-15 reps of squats, lunges, and leg press	30-minute steady-state run
Friday	5-10 minutes of light cardio	3 sets of 12-15 reps of bench press, shoulder press, and dips	30-minute steady-state bike ride
Saturday	Rest day		
Sunday	Long run: 1 hour steady-state run		

Let's fix that quickly by asking ChatGPT to change that for us

■ "I'm not able to use the gym equipment daily so could you swap out the exercises to be equivalent to ones that I can use only my own body weight for, keep the tabulated format."

Sorted

I'm not able to use the gym equipment daily so could you swap out the exercises to be equivalent to ones that I can use only my own body weight for, keep the tabulated format.

Sure, here is a modified exercise plan that utilizes bodyweight exercises that you can do at home without the need for gym equipment:  

Day	Warm-up	Strength Training	Cardio
Monday	5-10 minutes of light cardio	3 sets of 12-15 reps of push-ups, bodyweight rows, and planks	30-minute steady-state run or brisk walk
Tuesday	5-10 minutes of light cardio	3 sets of 12-15 reps of squats, lunges, and leg press using bodyweight	30-minute steady-state run or brisk walk
Wednesday	Rest day		
Thursday	5-10 minutes of light cardio	3 sets of 12-15 reps of pull-ups, dips, and leg raises	30-minute steady-state run or brisk walk
Friday	5-10 minutes of light cardio	3 sets of 12-15 reps of burpees, mountain climbers, and Russian twists	30-minute steady-state run or brisk walk
Saturday	Rest day		
Sunday	Long run: 1 hour steady-state run or brisk walk		

Let's see how long I should stay on this exercise schedule,

Ok, 6-8 weeks. Sounds fair.

How many weeks do you prefer I be on this schedule?

It's generally recommended to stick to a consistent exercise routine for at least 6-8 weeks   before making any major changes to your plan. This will give you enough time to see progress and make any necessary adjustments to your plan.

However, keep in mind that your individual progress will depend on many factors such as your current fitness level, diet, consistency, and overall health. So, you should monitor your progress regularly, and make adjustments as needed.

For weight loss, it's important to create a calorie deficit by burning more calories than you consume. I would recommend consulting with a registered dietitian to create a personalized meal plan that fits your needs.

It's also important to note that consistency is key, making sure to stick to a regular exercise routine and tracking your progress along the way can help you stay motivated and on track to reach your goals. And don't forget to consult with a personal trainer or a sports physician regularly to ensure you are on the right track and make any necessary adjustments to your plan.

Now let's see if we can get a meal plan to go with it, yup, no problem at all, need to tabulate that too.

My base metabolism is around 1500 kcals, factoring in movement, I should be around 2300 kcals, with that knowledge, could you draft a weekly meal plan for me that would create a calorie deficit enough for me to lose 1.5kg a month? Write it in a tab format, thank you

Sure, here is a sample weekly meal plan that will create a calorie deficit to help you achieve your weight loss goal of losing 1.5 kg per month, this is based on the assumption that your base metabolism is 1500 kcals and factoring in movement you should be around 2300 kcals:

Monday:

- Breakfast: 2 boiled eggs (140 kcals), 1 banana (90 kcals)
- Snack: Greek yogurt (80 kcals)
- Lunch: Chicken breast (150 kcals), mixed vegetables (60 kcals), 1/2 cup brown rice (110 kcals)
- Snack: Apple (65 kcals)
- Dinner: Grilled fish (120 kcals), mixed vegetables (60 kcals), 1/2 cup quinoa (110 kcals)
- Total: 895 kcals

Tuesday:

- Breakfast: Oatmeal (150 kcals), 1/2 cup blueberries (40 kcals), 1 tablespoon honey (64 kcals)
- Snack: Carrots and hummus (100 kcals)
- Lunch: Turkey breast (120 kcals), mixed vegetables (60 kcals), 1/2 cup sweet potatoes (110 kcals)
- Snack: Small handful of almonds (80 kcals)
- Dinner: Baked chicken (150 kcals), mixed vegetables (60 kcals), 1/2 cup brown rice (110 kcals)
- Total: 874 kcals

Regenerate response

Way better, I just copied it all over to Google Sheets

[google sheet link]

Can you tabulate the meal plan?

Sure, here is the sample weekly meal plan tabulated for ease of reference:

Day	Meal	Breakfast	Snack	Lunch	Snack	Dinner	Total kcal
Monday		2 boiled eggs (140 kcals)	Greek yogurt (80 kcals)	Chicken breast (150 kcals), mixed vegetables (60 kcals), 1/2 cup brown rice (110 kcals)	Apple (65 kcals)	Grilled fish (120 kcals), mixed vegetables (60 kcals), 1/2 cup quinoa (110 kcals)	895 kcals
Tuesday		Oatmeal (150 kcals), 1/2 cup blueberries (40 kcals), 1 tablespoon honey (64 kcals)	Carrots and hummus (100 kcals)	Turkey breast (120 kcals), mixed vegetables (60 kcals), 1/2 cup sweet potatoes (110 kcals)	Small handful of almonds (80 kcals)	Baked chicken (150 kcals), mixed vegetables (60 kcals), 1/2 cup brown rice (110 kcals)	874 kcals
Wednesday		2 slices of whole wheat toast (140 kcals), 1/4 cup of	Small banana (90 kcals)	Tuna salad (100 kcals), mixed	Small handful of walnuts (90 kcals)	Grilled steak (150 kcals), mixed vegetables (60 kcals),	875 kcals

🔄 Regenerate response

Let's see if we can get a shopping list done, yes, and yes we'll tabulate this too.

Sure, here's a sample shopping list for the weekly meal plan in the metric system, including the amounts needed in grams:

- 48 eggs
- 450 g of Greek yogurt
- 900 g of chicken breast
- 900 g of mixed vegetables
- 450 g of brown rice
- 450 g of quinoa
- 900 g of fish (e.g. tilapia or salmon)
- 450 g of oatmeal
- 450 g of blueberries
- 1 jar of honey
- 450 g of carrots
- 1 container of hummus
- 450 g of turkey breast
- 450 g of sweet potatoes
- 100 g of almonds
- 900 g of steak (e.g. sirloin or flank steak)
- 2 loaves of whole wheat bread
- 1 small container of cottage cheese
- 2 tomatoes
- 450 g of bananas
- 100 g of walnuts
- 2 cans of tuna
- 100 g of mixed greens
- 450 g of sweet potatoes

Please note that these quantities are approximate and may vary depending on the specific recipe, your preferences and serving size. You can always adjust the quantity to your liking.

It's also important to note that fresh fruits and vegetables may vary in weight, so you should buy enough to make sure you have enough for the week.

Now we have everything we need, copy it over to sheets and docs.

<https://t.co/1XDs9c4mkx>

<https://t.co/lDrqPJX6dx>

Let's see if we can also get the AI to make us a little tracker to put in sheets. It could, and also gave us an example of how to use it.

Thank you very much, AI Agent

For the exercise schedule create a simple tracker in tabulated format that I can use to fill out every day for 8 weeks?

Sure, here is a sample exercise tracker in tabulated format that you can use to track your progress for 8 weeks:

Week	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
1							
2							
3							
4							
5							
6							
7							
8							

You can fill out the tracker by listing the exercises you did on each day of the week, and adding the number of sets and reps you did for each exercise. You can also add notes about how you felt during the workout, or any modifications you made to the plan.

Just as we thought we had finished, we can ask the agent for some more ideas

■ What are some other things I could do to improve my overall health?

You can now dive further into any of these topics, by continuing to ask questions.

What are some other things I could do to improve my overall health?

Here are some additional things you can do to improve your overall health:

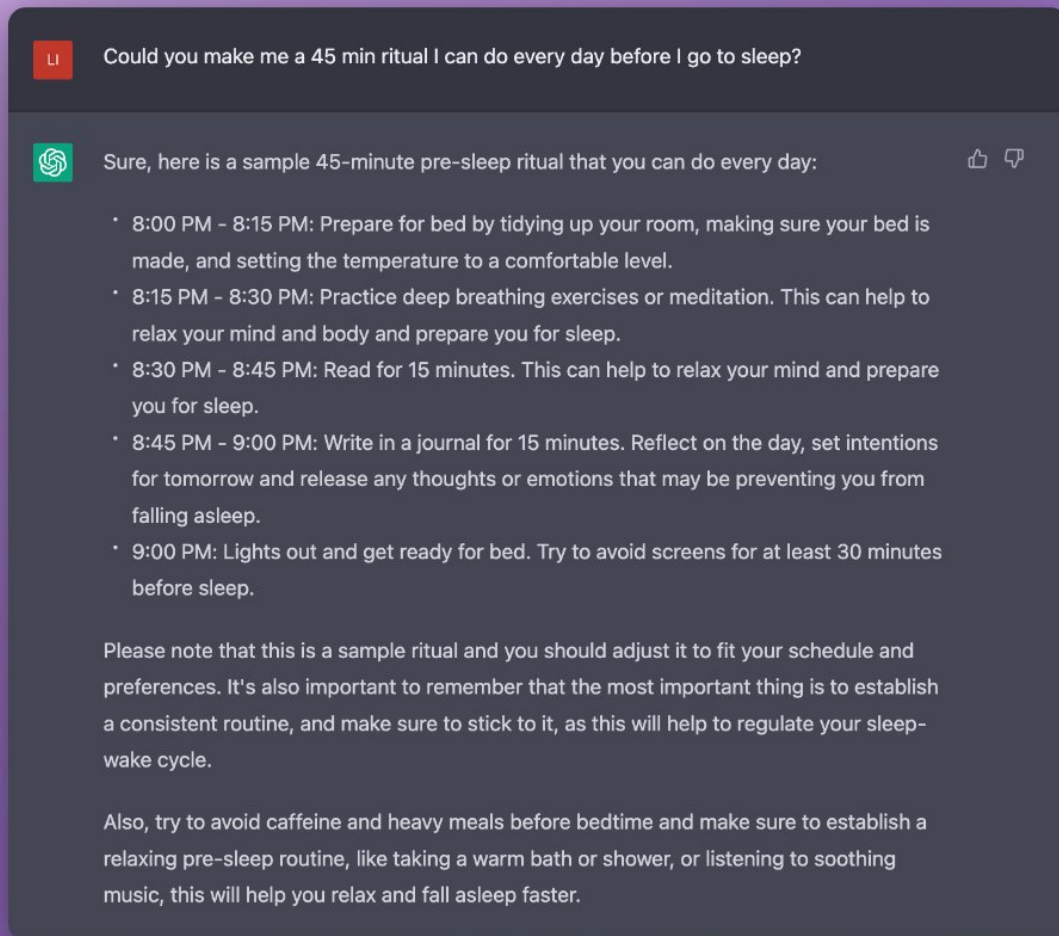

1. **Get enough sleep:** Aim for 7-9 hours of sleep per night. Sleep plays a vital role in maintaining overall health by helping to regulate hormones, metabolism, and mood.
2. **Manage stress:** Stress can have a negative impact on your health, so it's important to find ways to manage it. This can include activities such as yoga, meditation, or deep breathing exercises.
3. **Drink enough water:** Drinking enough water is important for maintaining hydration and overall health. Aim for at least 8 cups of water per day.
4. **Eat a healthy diet:** Eating a diet rich in fruits, vegetables, whole grains, and lean proteins can help to improve overall health and promote weight loss.
5. **Quit smoking and limit alcohol consumption:** Smoking and excessive alcohol consumption can have negative effects on your health, so it's important to limit or quit these habits.
6. **Get regular check-ups and screenings:** Regular check-ups and screenings can help to detect and prevent health problems. This includes dental check-ups, cancer screenings, and health screenings for conditions such as diabetes or high blood pressure.
7. **Socialize with friends and family:** Having a strong social support system can improve mental health and overall well-being.
8. **Engage in leisure activities:** Engaging in leisure activities such as reading, playing music, or going for walks can improve overall well-being and reduce stress.
9. **Take care of your mental health:** Your mental health is just as important as your physical health. Engage in activities that promote mental well-being such as therapy, counseling, and self-care.
10. **Consult with a healthcare professional:** Consult with a healthcare professional to create a personalized health plan that fits your needs and goals.

It's important to keep in mind that everyone's health needs are different, and what works for one person may not work for another. It's important to listen to your body and make adjustments as needed.

I actually need some advice on "before going to bed rituals" to improve my sleeping routine. Ohh would you look at that, AI has me covered.

It made a 60 min routine, I asked it to change it to start at 10 pm, and then also make it 45 instead of 60 min. Done

So that concludes our experiment with this Prompt hack. Our AI Agent turned out to be extremely helpful in this context.

I hope you found it interesting to follow along in a conversation like this, explaining the prompt hack by using it myself.

I hope you've found this thread insightful ■■■ ■■
