This is going to be a loooooooooong thread over many days even weeks so be patient. One of the most important lectures you never heard of took place in Sweden a couple of weeks ago. This lecture tells the story from an angle you never heard of even though its public information...

Let's do a full cricle over time and connect the dots.

"but they didn't know each other" is the storyline. " We got the proof that they did. This stretches far back, old structures and families some known and some are lurking in the shadows.

"In the light of reality" Americans correctly pointed out China or rather the Deep State as the problem, Barr, Ratcliff, Trump, patriots all point at China as the real threat...

What does China do or say?...

They point the finger at Sweden and tells the world that a few Swedes are interfering in their business... Just as the world bank stated in 1972 someone in China tucked this away as the world forgot the World banks statement...

"1972 the world bank said. "The one who controls the telecom-structure controls a countrys central nervous system." Put this away in the back of your head for now. I think you will understand the importance of this as we build this thread up...

The picture shows Ericsson Globe, or as we call it the centre of the universe - or if you want to paint the picture in the way of "the death star" the most powerful super weapon in the fictional world of Star Wars. The most powerful weapon is control over information?

The picture shows four world leaders that points the looking glass against the centre of the universe. One of the leaders is said to have congratulated Biden to the win but it is also possible that he knows about Panda electronics to name one company that the Chinese Government..

...owns or rather co owns with someone else. The sun- the light will destroy the unwanted power and chase the shadows away.

Sunlight - chases away the shadow(s)government.

We start with the election and Sidney Powell. She stated that this election is he most corrupt election ever. And she made a lot of people aware of Dominion - Dominion comes from Venezuela and Venezuela is like a Swedish colony. What Sweden or rather what someone controls...

...is importan. To understand the control we need to go back in time and thanks to Carl and his lecture we now have a timeline to build on. You need to go back to understand...

Since the lecture is in Swedish and of no use to most people in the english speaking world I used google translate so bear with me, some translation might be a little bit strange...

...but please try to see the whole picture instead of getting stuck. You will get the most important parts of this lecture and then you can do your own research and fill in the blanks.

In order not to loose anything I put this old thread here before we start. <https://t.co/5OkCcki05s>

#2 We start in Venezuela.

Venezuela has full representation of the regular gang, where nothing has changed. Now it so happens that

Venezuela is the world's most oil - rich nation but still poor. Someone else is seizing these assets. Who these others can be \u2026

#4 the modern Deep State. Felix Warburg and to be honest doesn't he look like super mario? Connections to Sweden through family and still not in control of any telecom structure. That control is located in Sweden.
