**#bajajfinserv**

**Decision time for the stock.**

**Has been mimicking closely the Nifty chart, so we can say that #Bajajfinserv can indicate what direction market can take from here.**

**RSI going in same direction as price but MFI showing positive divergence.**

If it breaks the expanding triangle on closing basis, we are looking at 20-25% correction from here.

Daily RSI was oversold at the bottom and failed to come over 30 in last 2 days.

Worrisome signs.

#bajajfinserv

Structure broken.

Target of 20-25% fall from here is activated.
