Struggling to find a scanner/strategy to trade stocks?■

In this thread, I am sharing setups I follow

■CCI based Breakout & Reversal scanner
■Breakout and reversal trading strategies
■Exit strategies

If you are really serious to learn don't miss no.9■!

Let’s go! ■...

1■Breakout scanner

CCI based breakout scanner to identify swing trades/positional trades/investment ideas.

There are a million scanners out there. Don't get lost and start focussing on just one and perfect it!

2■Reversal scanner

CCI based Reversal scanner to spot low-risk opportunities that will help you with great R:R trades
https://t.co/08cYSpFMb3

3■ Reversal from confluence of supports trading strategy

If you've been following me for some time, by now you know this is my favourite trading strategy which can be used to catch low-risk setups.

Do watch - probably something you've been searching for!

4■Mult-time frame analysis

Increase your winning probability by doing multi-time frame analysis. You do not want to buy a stock that is in a downtrend on Monthly/Weekly charts.

5■Trend following strategy

The only strategy you need to know. The greatest of great traders do trend following. So why not you?

6■Horizontal Breakout strategy

A simple line yet the most powerful strategy that I've come across till now. If you are a beginner struggling then this is a MUST watch

7■ Inverted HnS pattern

My favourite pattern in technical analysis which is highly reliable

8■Exit strategies

I discuss exit strategies for stocks that are trending and quite extended in this video
