### 1/ Thread – THE YEAR OF THE RAT

“15 days to slow the spread” began one year ago. It was March 2020, the Year of the Rat. Never was any year more fitting of the name. Never in history have the people been betrayed so callously, flagrantly and absolutely by their alleged leaders.

2/ They were betrayed by their WHO representatives,

<https://t.co/MmAJ5Tqq7N>

3/ and their national health directors.

<https://t.co/2WYBI7y9Ek>

4/ They were betrayed by medical journals,

<https://t.co/qjUki3DF0t>

Despite ignorance by many in the West, this article by The Lancet is a powerful endorsement of China's 2019 successful pandemic response. Hate to read stories by those paparazzi journalists who are experts at spinning but have little knowledge of science. <https://t.co/Q8rKwwTPsl> [pic.twitter.com/436BEmx9nl](https://pic.twitter.com/436BEmx9nl)

Can now confirm: Eric Feigl-Ding, the chief COVID-19 panic salesman on social media, quietly moved his family to Austria in the Fall so that his kid could attend school in person.

Yet Feigl-Ding has been a relentless proponent for school closures here in the United States.

215 million Americans would need to be infected with the coronavirus to reach herd immunity, a strategy Pres. Trump has said would make the virus "go away."

This strategy would result in 6,385,500 deaths based on the current US fatality rate of 2.97%. <https://t.co/5beVfRxwrx>

If we've never seen such a respiratory virus, it's because it doesn't exist. Highly transmissible respiratory viruses can not be contained or eliminated. In March, at a time when the behaviour and lethality of this infection was largely unknown, and in the justifiable panic following camera footage of people falling dead in the streets of Wuhan, the WHO's pandemic response plan, updated as recently as October 2019 was torn up. Fifty years of scientific and epidemiological research was dismissed, and instead Britain and Ireland, along with most of the developed world adopted the model espoused by the Chinese Communist Party.

The entire healthy population was locked up, elderly people were taken from hospital beds without expectation of further medical care, and legislation was passed, without parliamentary debate, removing fundamental human and constitutional rights-to movement, to association, to earn a living, to an education, to engage in public worship, and to access the range of medical services to which people were hitherto entitled.

Governments were advised in this course of action by scientists and medics whose identity, qualifications and aptitude for this work was largely hidden from public scrutiny. Even now, the conflicts of interest of these people on whose advice our futures depend are not publicly available.

A new directive from the WHO to every doctor changed fundamentally how deaths were attributed. Any death, within 28 days of a positive PCR test (which Kary Mullis, the test's inventor, and Nobel Laureate was clear should not be used as a diagnostic tool) was to be included in the covid fatality total, regardless of the context.

Kissinger warns the US and China must set rules to avoid de facto war. Call me cynical but we are talking abt a nation state here that exploits all arrangements to its favour or ignores them. Rules of this kind would buy time for Beijing to prepare better. <https://t.co/abdKyCy5dd>

The Judiciary is complicit
