1/ BITCOIN GAMING 2020 RETROSPECTIVE (a thread)

This has been a challenging year all around, but we've witnessed incredible commitment to building on Lightning.

The #bitcoin gaming community specifically used this year as an opportunity to bring people together through gaming.

2/ This year we've seen the #bitcoin gaming experiment:

- Onboard new entrants to #btc
- Make microearning for play possible
- Create new ad models to engage audiences
- Complete the in-game circular economy
- Add value to esports, connecting streamers & influencers

And more!

3/ With the cancellation of numerous IRL confs and meetups, the #bitcoin gaming community transitioned to online demos and tournaments.

[@MintGox](#), a next gen esports tournament powered by Bitcoin, was born to showcase companies building games on LN.

<https://t.co/30Sq2YREB1>

4/ Over the past 9 mo, [@MintGox](#) featured FPS, fighting, racing, battle royale, mobile games, & more.

The streaming dashboard intro'd a novel way to break the fourth wall, letting viewers interact directly with the gameplay, using sats to drop powerups, inc. bounty, & send tips.

5/ Since inception, [@MintGox](#) witnessed incredible growth (over 20% MOM inc. engagement) reaching global audiences and building a dedicated community. ■

The most recent MintGox event saw over 5,200 viewers, 10,000+ LN txs, and over 10 million sats (0.1 \$BTC) in prizes.

6/ Check out [@mintgox](https://t.co/30Sg2YREB1) at <https://t.co/30Sg2YREB1> and join the Discord below to stay up-to-date on upcoming #btc gaming events. ■■

7/ Gaming companies [@zebedeeio](#), [@thndrgames](#), [@donnerlab1](#), and [@satohisgames](#) all made significant progress in 2020, collectively moving the space forward and making #bitcoin gaming a reality (with even some events in VR!).

8/ [@zebedeeio](#)'s dev tools make the frictionless transfer of value in-game a reality via \$btc. ■

This year they launched their developer dashboard, Unity SDK, & gaming-focused wallet (over 100k tx since launch) featuring gamertags + static QR codes.

<https://t.co/fHr5uPM0Ap>

9/ Last weekend at [@MintGox](#), [@zebedeeio](#) announced their biggest news of the year: Infuse, which makes it possible to 'infuse' #bitcoin into any game.

Using [@CSGO](#) as the first case study, players earn sats instantly for in game actions.

Check it out: <https://t.co/GGG0ZILByZ>

10/ Leading the mobile gaming front, [@thndrgames](#) cranked out the hits: Bitcoin Bounce & Turbo 84.■■

Founder & CEO, [@jackeveritt](#), fought the app store battle and his efforts are clearly working with stats like these:

- 236,436 tx
- 31,696 MAU
- 4,414 DAU

<https://t.co/7KD510ZaDq>

11/ [@donnerlab1](#)'s online FPS, Bitcoin Bounty Hunt, paved the way in #bitcoin game development and the stats speak for themselves: ■

- Kills: 84,497
- Sats paid out: 5,631,432
- LN-payments: 471,418
- Avg payment size: 11.94
- Total player hours: 2,924

<https://t.co/K3vjExhAXE>

12/ @SatoshisGames's low poly, battle-royale, @lightnite had a big year with their early access release, Light■■Nite sessions, multiplayer, and numerous partnerships and skin collabs. ■■

Look for their gold release in 2021!

Check out the roadmap here:

<https://t.co/fEYTC575HE>

13/ While the Big 4 have made a lot of noise this year, we're seeing promising new entrants to the space.

@hangarsixgaming makes it seamless to earn bitcoin for playing @callofduty WarZone, with regular tournaments with 50k sat prize pools and free entry.

<https://t.co/wZnv4rFg0T>

14/ Newcomer, @HS3D recently released an adorable, multiplayer game, Bitrealm, where users act as astronauts, frantically feeding "blob guy" various food items.

Easy game play, cute character appeal, and of course winning #BTC, make this game promising!
