India ETFs & Index Funds
@IndiaEtfs

Important.
Whenever you invest in Fund of funds, check the expense ratios of both the local fund & the global fund which is investing into.
e.g., Nasdaq FOF ER is 0.1%, but you have to add the ER of ETF which 0.54%, total 0.64%

Good to see AMCs like @EdelweissMF mentioning it.

> When you invest in a global fund, and compare expenses across funds:
>
> 1. Compare \U0001f34e to \U0001f34e: Total cost includes offshore fund cost plus what local AMC charges.
>
> 2. Get this data from the AMC website. Many 3rd party websites don\u2019t include underlying fund costs.
