India ETFs & Index Funds

[@IndiaEtf](#)

Important.

Whenever you invest in Fund of funds, check the expense ratios of both the local fund & the global fund which is investing into.

e.g., Nasdaq FOF ER is 0.1%, but you have to add the ER of ETF which 0.54%, total 0.64%

Good to see AMCs like [@EdelweissMF](#) mentioning it.

When you invest in a global fund, and compare expenses across funds:

1. Compare \U0001f34e to \U0001f34e: Total cost includes offshore fund cost plus what local AMC charges.
2. Get this data from the AMC website. Many 3rd party websites don't include underlying fund costs.

1/3
