### Northkoreas foregin policy,

**Most important Nortg korea follows its ■■■(Juche) ideologi, wich in short means self-reliance (Independent for itsself) based on historical inavsions by other nations, China,Japan,USA. Causing a genral hostlitiy against US allies.**

-Good relations can be saied are

1.China wich is the life source and only one who can curb North korea, but China is in need of North korea as China dosnt want the USA via South korea at its border and so China dose everything to maintain the status of NK. China cant comdem NK

2014 China condemned NK for a nuclear test wich was btw recorded as a 5.3 earthquake. But at that time Kim Jong-un had to show strength to get full controll of the army and curb rivals. NK gets everything needed via China also its the cause of always possible collaps with news.

Russia.

Russia also wants to avoid more US troops at the border and esspecialy in its weaker east but Russia sees in NK a good buyer for missiles and gives so sometimes its save veto in the UNSC. All sanctions were due to nuclear tests Russia couldnt prevent without losing face.

Russia and North korea established a special industrial cone ar its 18km long border in Rizon for a cooperative production as Russia sales the good and gives money to the Northkorean regime. Kim also visited Putin already in Wladiwostok. Russia buys many minerals from NK.

-Comunist states and Venezuela

The other comunist states and North korea defacto have a non written agreement in cooperatioms as North korea can build resturants and buildings there to generate money and even museums with wich NK makes money. A example Cambodias national museum.

North Korea sends residents personal with slave wages and their families kept hostage in North Korea in that way no one tries to escape otherwise their family would die but NK makes so much money. North Korea also sells its minerals to them and give them the free work forces.

-Not much interest into African but into dictatorship nations.

But North Korea knows it has to smuggle via corrupt African countries, especially North African countries to trade its drugs under wrong flag in gigantic masses. An example was 2003 at the coast of Australia,

A North Korean ship got destroyed the Pong Su which had loaded 125KG (276lb) Heroin as the ship used the flag of Tuvalu. A gram Heroin costed in the US alone \$307 on a street. Estimated \$38 million.

-Iran

Iran and North Korea establishing every year better relations as Iran wants North Korea to share with them part of the military technology especially in terms of rockets and nuclear bombs. It is known that Iran has students and scientists in NK under good conditions.

As Iran gives NK also the needed Uranium and weapons Uranium as Iran has huge resources of it. North Korea however gets parts of its oil from there as well North Korea can send resources to Iran. Iran and North Korea seeks to cooperate in their actions against the USA.

One of the most known Hacker groups Lazarus sits in North Korea which has a high professional hacker group which also attacked the USA and Israel under payment of Iran. China is a bit of mediator between both

-Pakistan / India

Both did seek help for their nuclear weapons from North Korea but more or less keep silent relations to North Korea but still North Korea sells weapons to both countries and sometimes even the Russian weapons where the heritage is unknown.

Europe /West

Its North Korea's piggy bank NK's Room 39 is very active. Room 39 is the generator of foreign money with all possible legal and illegal ways. All ambassadors in the western country's have only one purpose to use their immunity, clean money, send this via hidden channels

to North Korea. NK send as earlier mentioned cheap slave workforces which are surprisingly very much around in North Korea. However North Korea doesn't tolerate any direct influence from them or any other countries with exception of China. Room 39 is observing all the activity.

North Korea is even producing with wrong heritage product heritage for Chinese producers for clothing as example where the heritage is said in China but is produced in NK due to cheaper wage. The wages are up to 100 times cheaper. And those are sold by worldwide brands too..

Northkorea has diplomatic relations with 164 countries but also only 3 bilateral agreements, Palestine, Western Sahara and the EU. In Pyongyang are only 24 embassies represented these are: Brazil, Bulgaria, Cambodia, China, Cuba, Czechia, Egypt, Germany, India, Indonesia, Iran,

Laos, Malaysia, Mongolia, Nigeria, Pakistan, Palestine, Poland, Romania, Russia, Sweden, Syria, United Kingdom, Venezuela, Vietnam. North Korea has relations with Israel but doesn't recognize it and has very bad relations. Some embassies are remained after collapse of the UDSSR,

as example the East German embassy which is now the German embassy. North Korea has only a single not North Korean who works for the regime in the UN. He is from Spain and his name is Alejandro Cao de Benós de Les y Pérez, or short Alejandro de Benós.

He is special representative for North Korea's Foreign ministry. He has also a Spanish citizenship. He self declares himself also a Special Delegate of North Korea's Committee of Cultural Relations with foreign countries.
