Categories: Red Category

FYI – I told Bob that BC cannot engage on this issue – hiring a contractor to help with elections and that I would refer the email to you. I also suggested to Bob that James Lee talk to you about anything to do with the elections b/c BC cannot engage.

Subject: Haiti elections

Laura , just a heads up that James lee Witt has spoken to president Clinton about a company we are working with that does successful elections in underdeveloped and developing countries. The name is Smartmatic .

They just completed a successful election in the Philippines . I will send you an article on this . They also have extensive experience in many places . I will send you their record. They are one of the top three most successful companies in the world in this kind of work . I will send you some info on them . James lee will ask if the president has time to meet with them and hear their thought on the Haiti elections .

Bob J. Nash
 Senior Advisor

James Lee Witt Associates, part of Global Options Group

SOROS backed Clinton Staffer/Employee, Cheryl Mills and the Clintons recommended SMARTMATIC back in 2010 bc they held a "successful" election in the Philippines which was later discovered to be wrought with fraud and illegalities.

Five days before the elections, petitions were made to postpone the elections due to technical malfunctions with the electronic voting machines. The corrupt Supreme Court overrode these concerns.

A report by GFN 2010 Election Observers Team released on May 27 titled "Foreign Observers Challenge Election Legitimacy", presented arguments questioning the May 10, 2010 elections.

1. The Automated Election System (AES) was implemented without the appropriate field testing, and law-specified testing in actual elections.
2. The source code review was not completed and initial findings were not addressed.
3. No audit was done on the AES prior to the elections. There was only a mandated random manual audit which was not yet done at the time the report was written on May 27, 2010.
4. Several voter and security features were disabled prior to elections.

What we've just witnessed in the U.S. is straight out if a playbook, well designed and practiced. None of this happened by chance. They view you as property. They own you.
