On December 29 we were dillucidating here if the drops meant "surprise, relatively neutral expression" or "a negative expression, horror" (Remember: <https://t.co/J2gjQjAENw>). Well, December 22 drops seem to clarify it. First, the December 29 drop that generated the confusion 1/*

didn't appear in today drops, while several old ones have been posted again. I would say that all December 22 drops regarding facial expression mean and clarify "surprise". 2/*

And more. So, they didn't point to a negative event, just to one that generates surprise. 4/*

All these drops were completed with a Christmas gift one, confirming the surprise neutral meaning and adding a related positive one connected to the surprise. 5/*

Hours before all this, he dropped the following drops, I would say clearly realted to the thread "Countdown 3, 2, 1" I created a few days ago (Remember: <https://t.co/IJ9FpgT8yx>) 6/*

So confirming that 3 and 2 drops were pointing to a countdown. And I would say probably meaning that the countdown points to the reset. I said that if a "1" was posted at some point it could indicate a near reset event. Well, he posted it. 7/*

As that day there is a Christmas gift post, it could mean price increase, but also could indicate a date, the surprising event could take place in Dec 25 (Friday, fits the day expected for a reset), which fits the "1" drop, dropped 2 days before the event. 8/*

Finally we have to analyze the 3 sleeping images dropped in December 22. They could fit in the "overnight" aspect of the reset theory, the reset will happen just in a single night (Friday night) or a near short period (Friday to Monday). 9/*

Or they could just mean "Ei guys, sleep well, don't give a fuck about SEC's FUD". Remember, he anticipated a lawsuit on December 16 drop. 10/*

The don't give a fuck theory is corroborated with December 9 drops. There will be a fall (Buy more haha, just bought 333 XRP). 11/*

And the FUD/news will seem a very huge bad ones. 12/*

But in fact people makes it bigger than it is. 13/*

Because at the end it will be near to nothing (this drop is one of the 3 collapsing drops: the big white ball just posted is another one and the fall risk caution sing the other one). 14/*

So, surprise on December 25 (reset?), followed by a gift (price increase?) and sleep well (SEC's FUD will be nothing?). 15/*

Quod erat demonstrandum. 16/* [@looP_rM311_7211](#)
