#IEX finally getting close to my average price, will start adding it below 150 (15% further correction from here)

Please do your due diligence and do not copy me blindly here

My investments in IEX are part of an experiment to hold a good stock for 10 yrs + buying sporadically

IEX has also started ground work for trading carbon credits

Still believe this is one stock where dividend every year in 10 years can be equal to my entire investment amount

considering it throws up so much cash

Still maintain
NSE + Zerodha = IEX
