**A car with a 12 month waiting period in the 80s ruled the Indian roads for over 3 decades**

**A thread on Ambassador cars ■**

1/

1956, UK - Morris Motors manufactured and sold 3 variants of Morris Oxford car

It sold the rights and tooling for these cars to Hindustan Motors, a subsidiary of CK Birla group to manufacture and sell these cars in India

2/

**Hindustan Motors Limited**

1956 - Morris Oxford Series 1 model was branded as Hindustan 10, Series 2 as Landmaster and Series 3 model as the Ambassador

3/

Out of the 3 cars, Ambassador was the best both in terms of looks, space and ruggedness required for Indian roads. It cost around 14000 Rs in 1958 when the production started

It was positioned as the family car given the kind of space available for bigger Indian families

4/

At that time, there were not many Indian automobile brands. Standard 10 and Mahindra's Jeep were the only major car brands available.

The government controlled production and was encouraging domestic production. This helped all these 3 players

5/

But Ambassador took the lead right away capturing a large share of the market. It became very popular with the politicians & govt officers becoming their vehicle of choice

It became a symbol of esteem and power because of this. And began to be known as king of Indian roads

6/

The car also became popular with families because of good space. And even started getting used as taxis. And interestingly, its brand didn't get dilute because of this

Though when Premier Padmini was launched in 1964, it became popular with families & took some market share

7/

But Ambassador remained most respected car brands in India. During the peak of its popularity in early 80s, it sold close to 24000 units per annum

And ranked 3rd after Mahindra and Premier Padmini in market share. In 80s it's waiting period after ordering was close to 1 year

8/

But in 80s, its problems started increasing. Government reduced protectionism and started allowing foreign JVs and entry of new players

1981 - Indian Government created a PSU called Maruti Udyog. It signed a JV with Suzuki and started producing Maruti 800 in 1983

9/

Despite all the positives of Ambassador, it's mileage was very low and there was not much rework done on the design in past 2 decades

Maruti on the other hand looked more stylish, had a better mileage and cost only 50000 Rs, much lower than Ambassador

10/

# Driving will never be the same again.

Look At The Bountiful Simplicity  
There's Nothing Superfluous.  
Functional Design Assures Your Continuing Enjoyment.  
Comfortable Driving In Your Atmosphere.

Engineers, ergonomists... the extensive panel design offers basic concepts of safety and human engineering. Insuring comfort in the spacious interior, reinforced by advantages of the FF System, constant angle of 30-degree back during driving.

**Unique 4-Cycle Engine**  
Compact, lightweight OHV 4-cylinder engine for improved fuel economy and high-speed cruising. A multi-angle performance for the MARUTI 800.

**The Superior FF System**  
In the FF System the front-mounted engine is used to drive the rear wheels. At a push, it's possible to have the front of the car in the middle of the front wheel's grip. And also much be surprised with the proportionally responsive steering. That's because the driving wheels are also the steering wheels.

**Small Turning Radius**  
Parking and U-turning become a snap with the ultra-tight turning radius of only 3.4 m.

**Outstanding Fuel Economy**  
Because it's a car for daily use "maximum of" becomes one of the first rules. The MARUTI 800 is a lightweight vehicle with a fuel efficient engine, combine this with its low wind resistance and you have a car which saves today's scarce funds.

**Fully Reclinable Sliding Front Seats**  
All models come equipped with fully reclinable sliding front seats (springer and door). Whatever the shape of your body the seats can be adjusted to give you the maximum in comfort and ease during driving.

**SAVE ENERGY WITH MARUTI**

After just 2 years of launch, Maruti stormed the Indian market taking away 34% of the market share with major contribution from 800

11/

Ambassador moved to 4th spot now as it didn't remain much popular with families any more who wanted more cost efficient vehicle. However it continued to be the vehicle of choice for government officials and politicians still

12/

Hindustan Motors tried fighting back introducing better versions of Ambassador

Launched Nova in 1990, classic in 1998 and Grand in 2003. However the design was almost the same. There was no way it could compete with the new stylish Indian and foreign cars

13/

In 89, Ambassador sold 35000 cars with a market share of 13% down from 17% in 85. And just 9% market share in 1995

With Tatas, Hyundai and Toyota entering the market, Ambassador was on its way out

14/

The final blow came from the government buyers in 2003. When the new PM Atal Ji opted for BMW over the Ambassador 1st time ever

And in 2014, Government decided to start buying other brand cars for its officers. Fighting with losses, Ambassador decided to shut down production

15/

In 2014, Hindustan Motors manufactured the last Ambassador car.

The brand was sold to the French PSA group for just 80 crores INR in 2017

More than a car, Ambassador will remain as an emotion for many

16/16

Amul on Ambassador shutting down production in 2014
