I don't understand one thing, when you know that these people auctioning muslim girls (using their profile pics)on apps are fully backed & protected by state, what is the need to upload your pics on social media? +±

They can morphe your pics to any extreme extent(beyond anyone's imagination) & no one is going to act against them because they are allowed to do this by none other than present Anti-muslim regime. ++

Hum ladko ki G phat jati hai apni details share karne mai just because of the hindutva's muslim blood lust. Aap ladki hokar pics post kare ge aur expect kare ge they will show some mercy towards you. No, you are living in fools Paradise ++

They are dreaming off 24*7 of raping muslim women. U can't expect Mercy from anyone who is dying to get you in his bed & rape you. ++

When you know there is no solution at present to stop them because every person/institution that is supposed to stop them is in their favor & no body will act against them, the least & most probably the only option you are left with at present is to ++

delete your personal details from social media & stop uploading your pics on internet.This is the only option you are left with to keep yourself in safe Zone in present circumstances.

End.
