While Ted Cruz incites sedition over election results in swing states Trump lost, Cruz's own state of Texas doesn't pass a smell test.

Do we just accept their election results without question?

A TX county who's actually SUING Trump also voted for him for the 1st time ever?■■

Zapata County TX is 95% Hispanic/Latino

In Feb 2020 County Commissioners voted 5-0 to deny entry to US Customs & Border Protection

Then the County actually SUED Trumps WH claiming the building of the wall was a racist assault on residents

But Trump had a record breaking win?■

South Texas landowners are hoping to use President Trump's own words against him in a new border wall lawsuit

> Landowners are alleging that the construction of the barrier is driven by little more than racism and politics and is therefore unconstitutional, according to a new lawsuit.

Since 1920 Zapata County hadn't voted for a Republican President
In 2016 Clinton trounced Trump winning 2-1
Yet in 2020 Trump flipped a 33-pt loss
into a 5-pt win?

We should accept this without question?

Especially considering that in 2020 Dems won EVERY OTHER RACE in Zapata

United States Senator

Choice	Party	Absentee Voting		Early Voting		Election Day Voting		Total	
John Cornyn	REP	59	29.80%	872	44.17%	522	43.57%	1453	43.12%
Mary "MJ" Hegar	DEM	137	69.19%	1055	53.44%	624	52.09%	1816	53.89%
Kerry Douglas McKennon	LIB	0	0.00%	26	1.32%	25	2.09%	51	1.51%

	Cast Votes:	217	100.00%	2092	100.00%	1318	100.00%	3627	100.00%

Zapata County had 725 new voters

2016 Votes for Prez =3142
2020 Votes for Prez = 3867

Did these new voters all vote for Trump? Could be since Trump got over 1000 new votes

2016 Trump Votes =1029
2020 Trump Votes = 2032

In 2020 Biden got 12% LESS VOTES than Hillary in 2016■

When I looked at Kentucky I found a county with more registered voters than age-eligible people. Same in Zapata.

In 2018 they estimated 6,683 people above the age of 18
In 2020 they had 8,257 registered voters

Zapata seems to have 24% MORE registered voters than people over 18?

Counties showing more registered voters than people may be due to officials not maintaining their voter rolls. People who move or die are often not removed.

But it also presents opportunity for those with nefarious intent. For example, Russia targeted systems in all 50 states.

Senate report: all 50 states were targeted by Russian interference ahead of 2016 elections

Politics Jul 25, 2019 7:06 PM EST

WASHINGTON (AP) — Robert Mueller warned that Russian interference is still happening “as we sit here.”

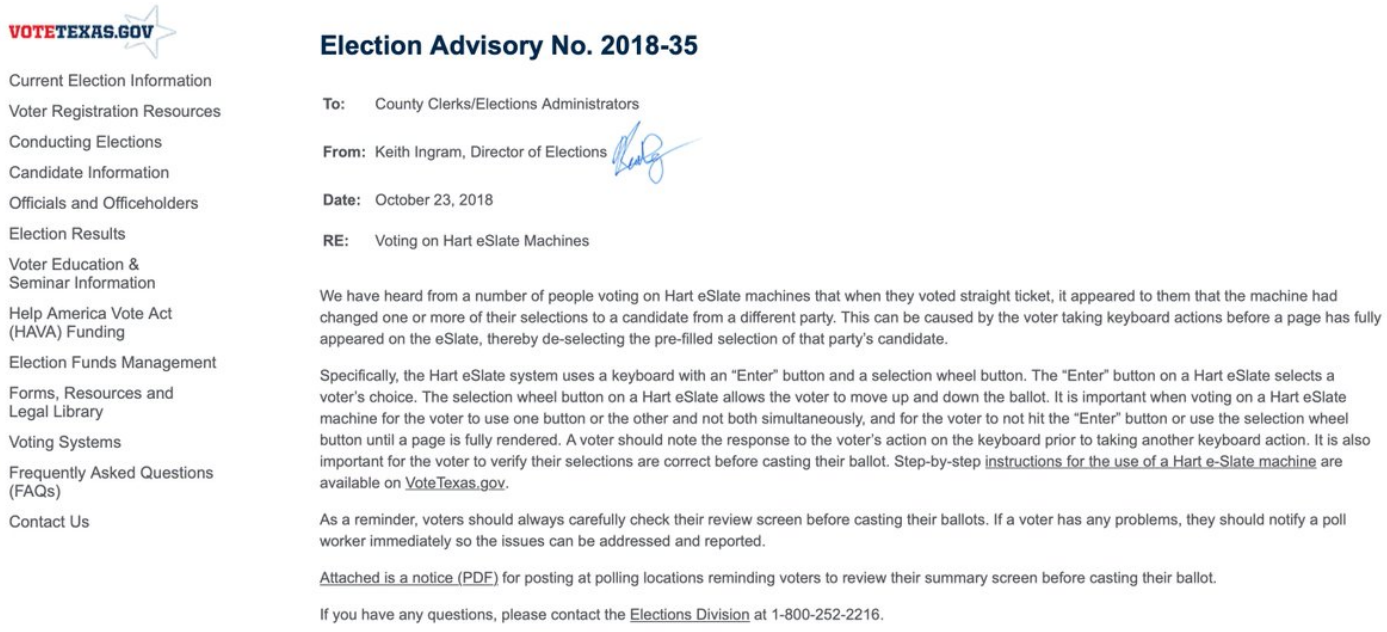

Zapata wasn't the only odd results. Trumps 2016 Rio Grande Valley performance, a mostly Hispanic–Latino population, was dismal & represented a GOP 80-yr-low.

But again in 2020 he nearly doubled his votes

Some say its due to heavy campaigning, but there may be other explanations

In 2018, reports of vote flipping in the Beto-Cruz race were so prevalent the Sec of State addressed the issue. Texas didn't dispute it, they just told people to be careful when they voted.

Would Ted Cruz be in office today if we were able to properly audit/recount the results?

From: Keith Ingram, Director of Elections

Date: October 23, 2018

RE: Voting on Hart eSlate Machines

We have heard from a number of people voting on Hart eSlate machines that when they voted straight ticket, it appeared to them that the machine had changed one or more of their selections to a candidate from a different party. This can be caused by the voter taking keyboard actions before a page has fully appeared on the eSlate, thereby de-selecting the pre-filled selection of that party's candidate.

Specifically, the Hart eSlate system uses a keyboard with an "Enter" button and a selection wheel button. The "Enter" button on a Hart eSlate selects a voter's choice. The selection wheel button on a Hart eSlate allows the voter to move up and down the ballot. It is important when voting on a Hart eSlate machine for the voter to use one button or the other and not both simultaneously, and for the voter to not hit the "Enter" button or use the selection wheel button until a page is fully rendered. A voter should note the response to the voter's action on the keyboard prior to taking another keyboard action. It is also important for the voter to verify their selections are correct before casting their ballot. Step-by-step instructions for the use of a Hart e-Slate machine are available on VoteTexas.gov.

As a reminder, voters should always carefully check their review screen before casting their ballots. If a voter has any problems, they should notify a poll worker immediately so the issues can be addressed and reported.

Attached is a notice (PDF) for posting at polling locations reminding voters to review their summary screen before casting their ballot.

If you have any questions, please contact the Elections Division at 1-800-252-2216.

In 2020, Rudy Giuliani congratulated Texas on how smart they were to decertify Dominion■ Texas refused to use Dominion machines in 2020

But the Hart machines which reportedly flipped votes from Beto to Cruz were still used in most of the counties■

Speaking of technology...

I worked with DC Report & reported how the Sec of State was warned about bugs in the ES&S machines being used in Texas for a year before the election. The technical issues called into question the trustworthiness of the machines. What did they do? Nothing

https://t.co/MoSXNELR5Z

The Sec of State who ignored security concerns came on board after the prior SOS resigned after a bungled voter suppression plot.

A Judge stopped Texas after they issued "ham-handed & threatening" letters to 98,000 legal naturalized Americans to cause voting "fear & anxiety"

license records matched with voter registration records. Notwithstanding good intentions, the road to a solution was inherently paved with flawed results, meaning perfectly legal naturalized Americans were burdened with what the Court finds to be ham-handed and threatening correspondence from the state which did not politely ask for information but rather exemplifies the power of government to strike fear and anxiety and to intimidate the least powerful among us.[1] *See* Attachment A (TX-LULAC

[1] *Boustani v. Blackwell,* 460 F. Supp. 2d 822, 827 (N.D. Ohio 2006) (Boyko, J.) ("This Court has personally presided over numerous naturalization ceremonies and has witnessed firsthand the joy of these new Americans and their intense desire to participate in this nation's democratic process. There is no such thing as a second-class citizen

Exhibit 4). No native born Americans were subjected to such treatment. *See* U.S. CONST. amend XIV,

By the time the Judge halted the plot, out of the 98,000 voters who got threatening letters, ONLY 80 people (.0008%) were found to be ineligible to vote.

We need to update voter rolls since people move or die but this was more like voter suppression than voter roll maintenance■

The New York Times

Texas Ends Review That Questioned Citizenship of Almost 100,000 Voters

Voters in North Austin, Tex., in 2016. The secretary of state agreed on Friday to formally end a review of the voter rolls that a federal judge said unfairly targeted naturalized American citizens. Ilana Panich-Linsman for The New York Times

By Liam Stack

Putting all of this together it calls into question how Texas themselves are handling "free & fair elections" and if their own elected officials truly represent the will of the people.

Texas has led the fight claiming election irregularities but let's look at THEIR elections.

The GOP demand audits/hand count in states Trump LOST. But why not states that Trump WON? Cruz's own questionable election results were never recounted■

In Kentucky 6 counties were audited but not the ones where Mitch had odd results

We must legislate to mandate audit/recounts

The danger of Team Trump's disinformation campaign is it misdirects us & suppresses legitimate questions of how Graham, Cruz, Collins et al actually won.

Experts are concerned how technology cast & count votes & we can't wait til the eve of the next election to start fixing it.

We must address election security, voter suppression, oversight & mandatory audit/recounts to get ready for 2022.

It must start NOW or in 2 yrs we may see a new crew of gun-toting, conspiracy theory, seditionists head into Congress & can we trust the results that got 'em there?
