So I feel the need to do this, in attempt to protect some people. I BELIEVE @WARONRUGS
is scamming it’s following. They came from ASEAL, the group that was anti rug and ended up rugging. I shilled I am aware, I made concerns clear in a hope to protect my following and (1/?)

I am here to once again try and do this. Shappy one of the admins, dumps on all of you his following after loading his bag very early with projects they may or may not be paid to endorse. There have been examples of those projects for example, “just hodl” the (2/?)

project that followed ASEAL ended in a rug. The reason I know this for a fact is I have his wallet address. Shappy during the ASEAL admins days knew forced admins to verify their addresses. (3/?)

Shappy dumped all of his ASEAL tokens two days before the announcement that the liquidity was being drained. You can see my tweet here: https://t.co/rfVtoK7X2I

> Eh if you\u2019re still in I would advise getting out. They have continued to do dumb things since I left and this is the worst. If you want to stay all power to you. $ASEAL https://t.co/8UM0UjgONj pic.twitter.com/OKBRYoaRTb

Video proof of Shappys dm and wallet:

https://t.co/CL450oXdAg transaction on the 9th before his the liquidity drain of $ASEAL on the 11th

You can look into the other projects he was able to load up early on, shilled, that later turned out to be rugs.

They have a moral guise, into taking all your funds. They made a fake $BASE telegram channel to try and actively fud the project. https://t.co/Oz23Wy2FZk as you can see here. I'm not touching anything these people touch with a ten foot pole. You DYOR though, I did.

$ASEAL used a bot to get to #1 on dextools and I believe they use this on other projects, I know this because it was discussed in admin chat for ASEAL. Projects they endorse constantly go to #1 on DEXtools and magically disappear.

If this all can be explained and I will delete.

They actively ask for tips as well, do you guys not make enough on your PNDs?

Note this thread uses $ASEAL and $JH as examples there are other coins they play with and continue to play with you can see that through the transaction history's. This is not specifically just about those "prorekts"
