A simple #TechnoFunda screen using [@mystockedge](#) -

Relative Performance + Relative Strength + CFO

#MANORG - R.Damani has 2.17%

Now from here you get to digging in more

The screenshot shows the StockEdge app interface. At the top, there is a search bar with the text "Search for a stock...". Below the search bar, the app displays a "Relatives scan" screen. The screen is divided into two tabs: "Scans" (selected) and "Stocks". Under the "Scans" tab, there is a section titled "Scans in this Combination Scan" with a count of 7. The list of scans includes:

- Stock Outperforming Benchmark Index in both 1 Week and 3 Month
- Stock Outperforming Sectoral Index in both 1 Week and 3 Month
- Increasing Relative Strength - Benchmark Index
- Increasing Relative Strength - Sectoral Index
- Increasing Cash From Operations
- Consistent Cash From Operations
- Consistently Growing Cash From Operations

At the bottom of the list, there is a blue button labeled "Add Scan". On the right side of the screen, there is an "Information" panel with a "SCANS" section. It contains a "How to add scans" section with instructions: "Click on '+' sign to add all the scan that you wish to combine, you can search by scan name and then click on star to add the scan to the combination scan." Below this, there is a section titled "How many Scans can be added?" with an expandable arrow.
