@equialpha

As I said yesterday, I will be sharing the some of my screeners in this thread ■

Please note Screener will help you to reach momentum but you need to see chart & further segregate trends manually (1/n)

Do retweet & like so that it reaches maximum people

Screener 1) +ve ADX DMI Breakout to find out where the action is going on a particular day, you can then look onto stocks and find setups and patterns to trade.

Link - https://t.co/fIKlWSloNw

(1/4)

Screener 2) Going one level more deep into ADX where we find up stocks which are already in trend on weekly

1) Weekly ADX >25 indicating the trend is already there
2) +DMI breaking out
3) Stock within 15% of 52w high
4) Stock above 200 SMA

Link- https://t.co/ZcyCMdA5vK
(2/4)

Screener 3) This is based out of within 20% of ATH Stocks. I have also added few fundamentals to it. You can change variables according to it

Link - https://t.co/fW3pU1rOuX

(3/5)

Screener 4) RSI which is a momentum indicator

RSI breaking out can give you names where momentum is picking up and then you can look onto charts for buy points

Link - https://t.co/WHvZuIdsCU

(4/5)

Hope this helps you in finding breakouts(variables can be changed)

I have 1 more screener though it is less used but it gives sleeping giants abt to wake. Will share only if ppl support this
