3. You cannot accomplish everything in a day but you certainly can accomplish everything in a week.

Set goals every night for things you want to accomplish the next day and set goals on a Sunday for things you want to accomplish the coming week.

4. Create To Do Lists

The small act of striking something off your to do list triggers dopamine in your brain that helps you keep going

5. Learn to prioritise

Not everything and everyone is equally important, so you will have to learn to prioritise one over other

6. These are just some of the things I do. If required will write a detailed post on things I do to manage my time.
