Those who use multiple screens, keep eyes and neck safe in long run 11 tips here

1

Sit at least 5ft away from nearest screen

2

Keep centre of upper half of screen at eye level

3

Keep brightness minimum and switch on bluelight filter

## 1/3

4

Blink ur eyes deliberately often and use caaboxymethylcellulose (after consultation) eye drops twice or thrice a day

Place main screen in the middle to minimise neck movement

6

Use chair with neck support and lumbar back

7

Use HD screen minimum and preferably QHD

2/3

0

Use all monitors with same display depth

9

Use one CPU with multiple monitors for better control

10

Keep the screen which use for brokers terminal farthest, stare less at PnL live

11

Do not eat heavy food/oily snack inbetween which tire u and impact focus
