3 Ways to ride a stock (a thread) >Do retweet if it adds value as this took a long time for me to make

1) 10/20 Day EMA - Enter the stock as it comes up back to the 10/20 day EMA and ride it till it drops below or SL hits as explained below

Eg -Nitin Spinners as below chart

2) Weekly Super trend (Setting 2,7): Whenever trend changes , volatility increases & supertrend measures volatility..That's the logic behind it

Eg - Deepak Nitrite

[@caniravkaria](#) [@RajarshitaS](#)

dev777 published on TradingView.com, Mar 17, 2022 17:27 UTC+5:30

DEEPAK NITRITE, 1W, NSE O2070.05 H2272.75 L2031.20 C2228.90 +178.25 (+8.69%)
Vol 6.595M 5.385M
Supertrend Auto HTF 2369.25 0.00 0.00

3) 10 Week MA : Trend following can be done using 10 w MA

Eg - Saregama

dev777 published on TradingView.com, Mar 17, 2022 17:32 UTC+5:30

SAREGAMA INDIA LTD, 1W, NSE O4900.00 H4900.00 L4185.00 C4388.80 -463.00 (-9.54%)

Ote - Fundamental analysis has to be done for best results as these are to be applied on a growing co + sector movt together ..Eg If you will apply to random co with low RS or low growth..This might be very choppy

Do retweet if make sense so as I can make more of such thread
