In a strong counter, always wait for a candle to stop breaching the previous candle's low and look to increase your allocation as the risk is limited.

NIIT - a new high <https://t.co/o9Sv2yT5m5>

One application of Fibonacci is to look for the retracement level in the strongest stocks. A strong stock must not retrace below 38%.

NIIT Limited. That often helps in timing our SIP purchases/swing trades. pic.twitter.com/6IB7zNJOFI
