Central Pivot Range—(CPR)

What does it mean?

7 tweets that will teach you about its basics (and much more):■

Collaborated with @niki_poojary

@niki_poojary 1/ What is CPR?

The basics of CPR, how it's calculated, and TC and BC in CPR.

User: @ZerodhaVarsity.

One can also gauge the trend whether bullish or bearish.

Explained in very simple words here.

https://t.co/dBLD7E5vAH

@niki_poojary @ZerodhaVarsity 2/ What are the Uses of CPR?

User: @YMehta_

A thread that provides examples along with the concept.

Also includes an Intraday Trading Setup on 5 min candle.

https://t.co/qRwjbtNTIG

> #CPR is an indicator which is used for #Intraday in Stock Market.

@niki_poojary @ZerodhaVarsity @YMehta_ 3/ How to analyze trends with CPR?

User: @cprbykgs

How to interpret CPR based on the candles forming either above or below the daily and weekly CPR.

He is the most famous guy when it comes to CPR, so go through his Twitter and Youtube accounts.

https://t.co/z0nJLPnazM

CPR indicator trend analysis:

Candles below daily & weekly CPR \U0001f43b
Candles above daily CPR but below weekly CPR early confirmation of \U0001f402
Candles above daily + weekly CPR strong confirmation of \U0001f402

Isn\u2019t it simple?#cprbykgs #cprindicator #nifty #banknifty

— Gomathi Shankar (@cprbykgs) January 25, 2022

@niki_poojary @ZerodhaVarsity @YMehta_ @cprbykgs 4/ Interpreting longer timeframes with CPR

User: @cprbykgs

Trend Reversals with CPR when the trend is bullish and it enters the daily CPR range.

https://t.co/YSdBrUZSgK

#banknifty

Candles above monthly CPR- Bullish
Candles above weekly CPR- Bullish

Now, whenever candles enter daily CPR range it indicates weakness of current trend & early signs of trend reversal.

So, wait for the candles to exit the daily CPR range then take the trade. (1/4) pic.twitter.com/7vaaLMCrV8

@niki_poojary @ZerodhaVarsity @YMehta_ @cprbykgs @PatilBankNifty 6/ What happens if we gap down below a HH CPR?

User: @PatilBankNifty

How longs unwind when trapped in a gap down and there is a continuous selling pressure.

https://t.co/TaTFZ17omh

> #Banknifty: We was in HH CPR with 2 Day CPR Relationship.Remember always when we are in HH CPR suddenly price opened below Today\u2019s HH CPR that will lead to unwinding long.Most probably we will be seeing continuous Selling Pressure.
> Example: Yesterday\u2019s Banknifty Movement. pic.twitter.com/N5R4oDwYgy
