#Commodities #Metal

Listing out the shares in metal pack where we can ride the commodity cycle even from the CMP

Will be posting long term charts here

Share and like for max reach ■■

#TATASTEEL

■Stock is in a sideways channel since past 15y

■Breakout above 750

■ A monly close above 750 will push the stock towards 950/1050 levels

■ Above that it would be a decade long multi-year breakout

■Its going for 200/300%+ gains

■ On yearly charts a triangle pattern breakout can be seen

■Rising iron ore prices are supporting the field

■ All over the world major economies are giving out big infra push to get the economy going

■This rally is shaping well with the fundamentals and economic recovery
