#TATAPOWER futures on daily charts, finally breaks out of the tight range. Open counts are at 150 and 187. https://t.co/lPshkD3FeA

#TataPower on daily charts - a breakout above 126 will be very interesting. It is bullish on higher boxsizes and has given a reversal after a pullback on lower boxsize. Price charts and RS charts self-explanatory pic.twitter.com/9ulYjvBVza
