#FranklinTempleton investors - our primary objective should be to safeguard our investment and not punish FT. Litigations will and should continue. But trying to teach FT a lesson by voting NO is shooting ourselves in the foot!!! Fire sale will destroy our investment

#FranklinTempleton investors - FT is anyways under a scanner. They cannot escape if they are doing anything wrong. But if Funds re-open , no one can save us and we will be doomed by our own choices

#FranklinTempleton investors - I know that everyone that FT has cheated us by illegally winding funds, however the point is that if we reopen now - everyone will redeem and it will be a panic situation where everyone will loose. A better option is to let the funds wind up orderly
