Reminder: if you're preparing for rebellion, so is the State. Not only are police & national guard being mobilized. All our favorite "local community leaders" are also being tapped to engage in peace-policing & other cooptation techniques.

You don't have to listen to "community leaders" or "movement elders". Most people who use such titles have been shown to be ineffective for decades. In order for us to succeed in the present, we must acknowledge the abject failures our elders.
